<!-- PageSpy SDK ---

<script crossorigin="anonymous" src="https://pagespy.jikejishu.com/page-spy/index.min.js"></script>

<!-- Plugins (optional, but recommended) ---

<script crossorigin="anonymous" src="https://pagespy.jikejishu.com/plugin/data-harbor/index.min.js"></script>

<script crossorigin="anonymous" src="https://pagespy.jikejishu.com/plugin/rrweb/index.min.js"></script>
</script crossorigin="anonymous" src="https://pagespy.jikejishu.com/plugin/rrweb/index.min.js"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script
```

## ⊗ Step 2

Initialize PageSpy and the plugins. Both their initialization parameters provide optional **configuration** items for customizing the behavior of the SDK:

▶ What functions do these plugins provide?

```
<script>
  window.$harbor = new DataHarborPlugin();
  window.$rrweb = new RRWebPlugin();

[window.$harbor, window.$rrweb].forEach(p \Rightarrow {
    PageSpy.registerPlugin(p)
  })

window.$pageSpy = new PageSpy();
</script>
```
